

## DIVA Collection 2014

Inspired by the Hollywood opulence and glamour of the 1960s, the new BROCHIER textile collection DIVA represents a perfect marriage of tradition with innovation.

Refined qualities inspired by fashion classics, DIVA's textiles have been re-designed and colored to suit the needs of the most unique and high-end luxury interiors, for a modern home, made of elegant and unique spaces.

Rigorously and proudly made in Italy, the collection offers a vast range of qualities: from the most spectacular and softest linen bouclet textures (all highly durable for upholstery use), to its velvets woven with gold threads, and to a variety of sophisticated silk damasks in innovative yarns.

For the hospitality market, the collection also offers a specific range of luxury basics, all flame retardant and woven in 100% Trevira CS. Both the natural look, and soft hand of the Trevira textiles resemble the qualities of natural and fine linens, making them suitable also for luxury residential projects.
